

BroadLocal™
with Geo-TRAC
GMB Managed Service

The Most Comprehensive Google My Business Managed Service

Get your GMB Site(s) professionally managed so you can do what you do best; Manage Your Business...

Over the years our marketing agency has been tasked with managing, optimizing and ranking thousands of Google My Business (GMB) listings. This was a time consuming and tedious process so we knew we needed a more thorough, but simple method. We researched available products and quickly realized the software managed solutions on the market were overpriced and underwhelming. Therefore, as any good firm would do, we decided to build our own solution to handle all our GMB posting needs.

In 2019 we merged with BroadMoar Agency and it wasn't long before we had BroadLocal, the solution to integrate GMB reviews, indexing, photos, attribute editing & more. Now, BroadLocal is one of the most popular GMB software management platforms on the market and it is used to manage over 14K listings globally.

What can BroadLocal Do?

- GMB Site Management and Optimization
- GMB GeoTRAC (See holes in your GMB Map Ranking)
- Review Management
- Directory Listing Management
- Spin Descriptions
- Posting Strategies and Advanced Scheduling
- Monitor Rank Tracking
- Post GMB Photos
- Monthly Reporting
- 1 or 5K locations, we can manage all properties seamlessly

...all for a small monthly management fee
