

Comprehensive Audit Report

- We Scan Over 6 Billion Sites
- Creates a Baseline for Your Business
- Includes Directory Audit
- Social Media Ranking
- Audit of Every Page of Your Website
- Ranking Report
- and much more....

What is a Comprehensive Audit?

Search Engines rely on many factors to PageRank a website. If not, sure where to begin? Start with a Comprehensive Audit Report from BroadMoar.

We will identify all optimization opportunities, and provide a specific strategic action plan outlining the steps we need to take to improve your local search performance and visibility. Additionally, we provide a clear, actionable, prioritized list of recommendations to help improve your business.

A comprehensive audit or having AMP, managed service, is a requirement to book a Strategic Marketing BluePrint Workshop.

The comprehensive audit will be about 10-60 pages depending on the size and length of time your business has been online.

Once you order your Comprehensive Audit, your advisor will help you understand the impact the finding are having on your business revenue and your success. Your business must be at least one year old to run the audit process.

What does the Audit show?

- Website's Organic and Local Search Optimizations
- Existing Directories, examine and list errors found
- Examine Local Presence Online
- Examine Social Media Presence
- Review Incoming and Out-Going Links
- Reviews and Reputation Management
- How do you Rank Compared to Your Competition
- Examine your Ranking Based on Local Keywords and much more...

Talk to your advisor for more details on getting a comprehensive audit for your business..
