

2 Day Business Profit TUNE-UP

- Value-Packed with Minimum Investment
- Improve the Obstacles Holding You Back
- We Also Evaluate Business Processes
- Held at Your Business Location

"We had never done a planning session like this and it was a real eye-opening experience. All the so-called "Digital Marketers" just wanted to sell me a monthly service, not BroadMoar. They looked at our overall strategy so we could start fresh with a complete comprehensive marketing strategy". A. Walker

BroadMoar's 2 Day Business Profit Tune-Up

This on-site workshop is a fast-paced business session to help fix a challenge that a business owner needs fixed.

Two days of intense problem solving with one of our consultants. A value-packed consulting project with minimal investment.

Bobby Richardson, who is a Senior Consultant and Managing Partner with BroadMoar Consulting, with over 35 years of experience with Apple Computer and IBM Global Services, will spend two days with you and your staff identifying goals and correcting the issues identified in the pre-planning for this workshop.

Once the 2 day workshop is complete, we can bring in subject matter experts to address other issues found during the workshop. Our clients usually select the areas of concern they wish to focus on, although we generally uncover other issues that also need correcting.

We work closely with business owners, management team, and your staff to make this a valuable, cost-effective, and fast-paced event.

Our clients typically come away with savings of at least 4-6 times the cost of this workshop. Talk to your advisor about pricing and travel costs.
